PROFILE

Computer Science student and multidisciplinary engineer with 5+ years of hands-on experience building full-stack applications, AI-powered automation, and secure business systems. I lead projects from problem framing through architecture, implementation, and delivery, with a focus on software that removes repetitive work and improves decision-making.

CORE EXPERTISE

FULL-STACK	AI + AUTOMATION	SYSTEMS
React / Next.js TypeScript / JavaScript Django / FastAPI	LLM agents / RAG OpenAI / Whisper Evals / Guardrails	PostgreSQL / Docker Search / OCR Workflow design

SELECTED WORK

PALLADIUM / Product Engineering

Document management platform for notarial offices, designed around secure files, search, and case workflows.

Stack: Django, React, PostgreSQL, OCR, Docker

HOWLX / AI Web Product

Award-winning AI transcription platform focused on turning conversations and recordings into useful business intelligence.

Stack: React, Python, Whisper, RAG, PostgreSQL

CHESS ANALYZER / Design + Engineering

In-browser analysis board powered by Stockfish 18 WebAssembly, with evaluations and move review running without a server.

Stack: React, TypeScript, Stockfish WASM

AUTOMATION TOOLKIT / Systems Engineering

A portfolio of conversion, retrieval, media, and workflow tools built to reduce repetitive operational work.

Stack: Python, Flask, FastAPI, Node.js, Docker

EDUCATION + DIRECTION

Computer Science - Tecnológico de Monterrey
Academic average: 93/100. Native-level English and Spanish. Open to remote work and relocation.

Professional focus
Full-stack product engineering, AI systems, business automation, internal tools, and technical ownership from idea to deployment.
