Monterrey, MX

Winner — Expo Ingenierías 2025 (Tecnológico de Monterrey) · Technology for Business Entrepreneurship category (HowIX)

EDUCATION

Tecnológico de Monterrey

B.Eng. in Computer Technologies (ITC) · GPA: 9.3/10

Monterrey, MX

Expected December 2026

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript, HTML/CSS, Swift, PHP

Frameworks: React, Django, Flask, Next.js, Django REST Framework

Databases: PostgreSQL, MySQL, MongoDB

Tools & Infra: Docker, Apache Solr, GitHub, Postman, Jira, Linux/Bash

Methodologies: Agile / Scrum, REST API design, RBAC/ACL

English: Professional proficiency — TOEFL iBT 114

PROJECTS

HowIX — AI-Powered Customer Service Analytics Platform²⁰²⁵

Python · RAG · LLM · Prompt Engineering

- Designed and built the full AI backend powering a customer service call analysis product, including a production-grade RAG pipeline, multi-layer prompt injection defenses, and a modular AI architecture for scalable inference.
- Won 1st place at Expo Ingenierías 2025 (Tecnológico de Monterrey) in the Technology for Business Entrepreneurship category.

Palladium — Notarial Document Management System^{2024–Present}

Django · React · PostgreSQL · Apache Solr · Docker Compose

- Solo-architected and built a secure, production-deployed DMS serving multiple Mexican notarías (Notaría 16, 27, 28) handling confidential legal documents.
- Implemented a 20+ table PostgreSQL schema with versioned business rules, dual-level document review, PEP tracking, and full RBAC/ACL permission system.
- Integrated Apache Solr for full-text search across document archives; containerized the full stack with Docker Compose for zero-downtime deployment.

YConecta — NGO Community Connection iOS App²⁰²³

Swift · Flask · MongoDB

- Led development of a full-stack iOS prototype enabling NGOs to post updates and collect community feedback; subsequently expanded the project into a web companion platform in collaboration with a live NGO partner.

Smart Stop — IoT Intelligent Bus Stop Prototype²⁰²³

NodeMCU · MySQL · PHP · JavaScript · Fusion 360

- Built and presented an IoT bus stop system with automated weather-responsive features at ExpoIngenierías; managed project planning, hardware design (Fusion 360), and full-stack software implementation.

AREAS OF INTEREST

AI/ML & LLM Systems · Full-Stack Web Development · Distributed Systems · Document & Knowledge Management · IoT
